

OneFit Report
(internet based service)

Subject	Inducaao-Magnetica, transformador		
Date	Monday 17 th May, 2010, 20:13		
Affiliation	teresajorge@netcabo.pt 85.138.33.251		
Abstract	Fit report produced with the fit results of function: y=L*1/(1 + (2*pi*x*L2*(1-k*k)/R)*(2*pi*x*L2*(1-k*k)/R)) to the experimental data.		
		$L = 0.11179 \pm 0.0025338$ $R = 10$ (fixed)	$k = 0.96309 \pm 0.062237$ $L2 = 0.011988 \pm 0.24208$
		$\chi^2[1] = 2.53277$	$\chi_t^2 = 2.53277$
