(internet based service)

Subject	Inducaao-Magnetica, transformador		
Date	Monday 17 <sup>th</sup> May, 2010, 16:41		
Affiliation	teresajorge@netcabo.pt 193.136.128.19		
Abstract	Fit report produced with the fit results of function: y=L*1/sqrt(1 + (x*L2*(1-k*k)/R)*(x*L2*(1-k*k)/R)) to the experimental data.		
		$L = 0.11333 \pm 0.0026654$	$k = 0.92396 \pm 0.054437$
		$R = 10 \text{ (fixed)}$	$L2 = 0.063954 \pm 0.06279$
		$\chi^2[1] = 0.236518$	$\chi^2_t = 0.236518$
